

Fuel economy, emissions and running costs

Petrol or diesel 

Example, fuel X.XL description, description

Running costs

Total monthly
fuel cost*
£2015

**VED (road tax)
for 12 months**

Year 1
£1850

Year 2 onwards
£150

Year 1 rate is linked to CO₂ emissions (the lower your vehicle's emissions the less you have to pay), fuel type and emission standard (diesels only). Cars with a list price over £40,000 when new pay an extra £325 per year from years 2 to 6, which is not included here.

Tailpipe Emissions

CO₂ is the main greenhouse gas responsible for climate change

Emission standards

ULEV ✓

Ultra Low Emission Vehicle **ULEV**

6 ✓

Euro Standard: 6d-Temp

Air quality emission zone compliance

Clean Air Zones
(England and Wales) **CAZ**

Ultra Low Emission Zone
(London) **ULEZ**

This vehicle meets the emissions standard for private cars set by government under the Clean Air Zone (CAZ) framework for England and Wales currently in place until 2025. Stricter CAZ standards and restrictions could then apply. Some local authorities may also impose more stringent tailpipe emissions limits and controls in certain areas, which this vehicle may not meet. A ULEV meets the current government standard for an Ultra Low Emission Vehicle, stricter standards could apply in the future.

Fuel economy

Environmental information: A guide on fuel economy and CO₂ emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO₂ emissions. CO₂ is the main greenhouse gas responsible for climate change.

Make/model: XT4 350T AWD AT9

Engine capacity (cc): 1998

Fuel type: Petrol 

Transmission: Automatic 9-speed

Fuel consumption:

Drive cycle

Litres/100km

Mpg

Low (city)

13,9

20,3

Medium (town)

10,0

28,2

High (rural)

8,2

34,5

Extra High (motorway)

10,1

28,0

Combined average

10,0

28,2

Carbon dioxide emissions: 228 g/km

All fuel economy and emissions figures are from the WLTP laboratory test and specific to this car. These provide a realistic and reliable indication of what's achievable, in ideal conditions. However, as no test can fully reflect real-world driving conditions and behaviour, there will always be some differences.

* Estimated monthly fuel cost is based on an average of 10,000 miles per year. Calculation uses the WLTP combined fuel consumption figure and fuel costs of: petrol £1.25/litre; diesel £1.30/litre (at April 2020).

HM Government
